CORRUGATED IRON SKYLIGHTING SYSTEMS

Skyspan's Corrugated Iron Skylights are designed for easy installation, durability, economy and a low silhouette.

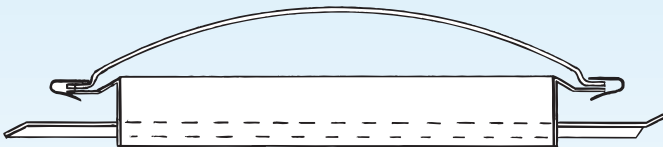

The standard dome is formed from 3.0mm opal acrylic and 4.5mm for larger sizes, depending on unit size. Tint and clear domes also available.

The Skyspan flashing is manufactured from 0.7mm zincalume for long service life and can be supplied in galvanised steel, copper, stainless steel and aluminium.

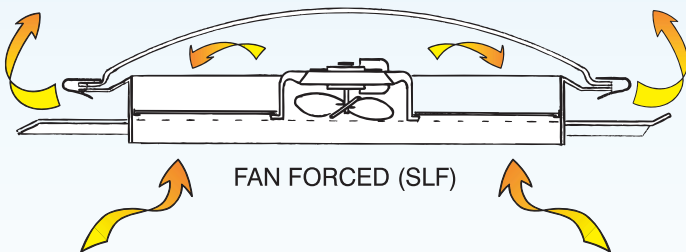

There is no fixing through glazing allowing for thermal cycling.
