

# SUNPIPE™

TUBULAR SKYLIGHTS

Bringing  
light into  
lives

**SKYSPAN**  
AUSTRALIA PTY LTD

1300 SKYSPAN [www.skyspan.com.au](http://www.skyspan.com.au)

# How it works.....

## Ray Attractor

Mirror like ray attractor with 98% reflectivity catches the sun's rays and bounces them down the shaft.

Bright Sunlight rays penetrate the crystal clear dome, filtering 99% of harmful UV rays.

Light travels down the highly reflective flexible tube.

Light enters the room via the diffuser which evenly spreads the goodness of the natural light.
